

Directions for use

MASTIX EXTRA **Mastix Extra**

Grimas Mastix Extra is a strong skin adhesive used for attaching Wool Crepe, moustaches, beards and goatees, tulle wigs, latex noses and sets and bald caps.

Mastix Extra is intended to be used for the above applications. If you want to use Mastix Extra for other applications (such as gluing other materials onto the skin), we can not guarantee safe use and it is your own responsibility to test the intended use first.

Procedure

Do not use near the eyes.

With aid of the applicator brush you spread Mastix Extra over the skin area where something is to be glued on.

Close the packaging properly after use.

Removal

Mastix Extra can be removed with Grimas Mastix Remover, cleanse further if required with Cleansing Cream or Make-up Remover.

Safety information

MASTIX EXTRA **Mastix Extra**

10 ml

100 ml

Composition

MASTIX EXTRA Mastix Extra

INCI	<%
Isopropyl alcohol	71
Butyl methacrylate	24
Ricinus communis oil	5

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

MASTIX EXTRA Mastix Extra

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.

Dr.med.Werner Voß

Investigating specialist
for dermatology and allergology

Safety declaration

Has been evaluated at:

The toxicity profile of the ingredients used, taking account of any contaminants present.

Interactions between the various raw materials.

Quantities of weight and volume the consumer is exposed to.

Foreseeable improper use by the consumer-group.
